

Primary Angle Closure Glaucoma

OCULAR RISK FACTORS

- Hyperopia
- Shallow peripheral anterior chamber depth
- Shallow central anterior chamber depth
- Steep corneal curvature
- Thick crystalline lens
- Short axial length

Glaucoma

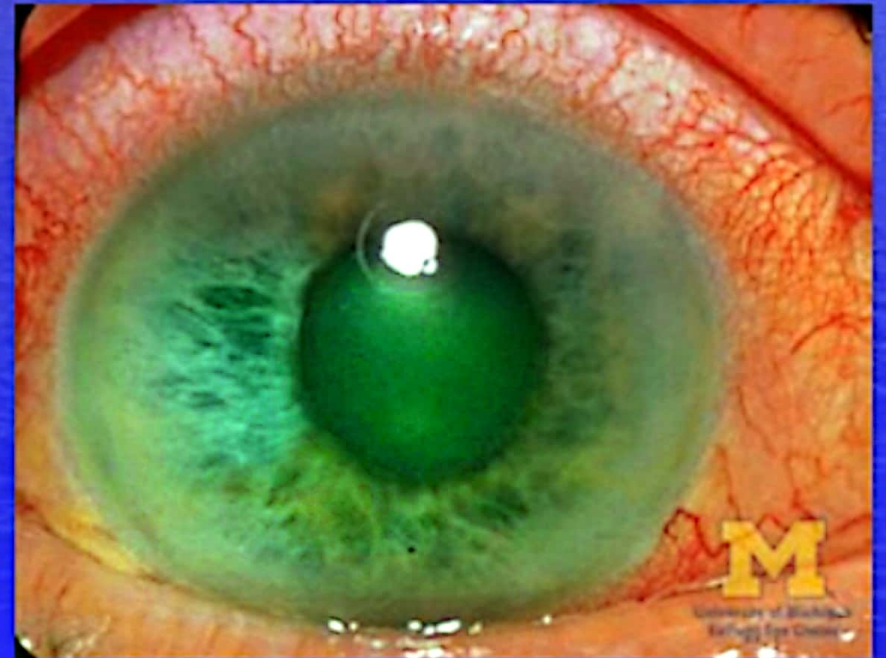

Angle Closure Glaucoma Symptoms

- Patients may be asymptomatic
- Sudden onset of:
 1. pain
 2. redness
 3. nausea/vomitting
 4. decreased vision
 5. haloes around lights

Angle Closure Glaucoma Signs

DRAMATIC

- Cloudy/steamy cornea
- Fixed mid-dilated pupil
- Conjunctival injection
- Elevated IOP

Management

- Primary(Acute) Angle Closure Glaucoma=URGENT REFERRAL
- Primary Open Angle Glaucoma=Non-urgent referral
