CLEAR

Shear force, Bending Moment and Axial Force Diagrams.

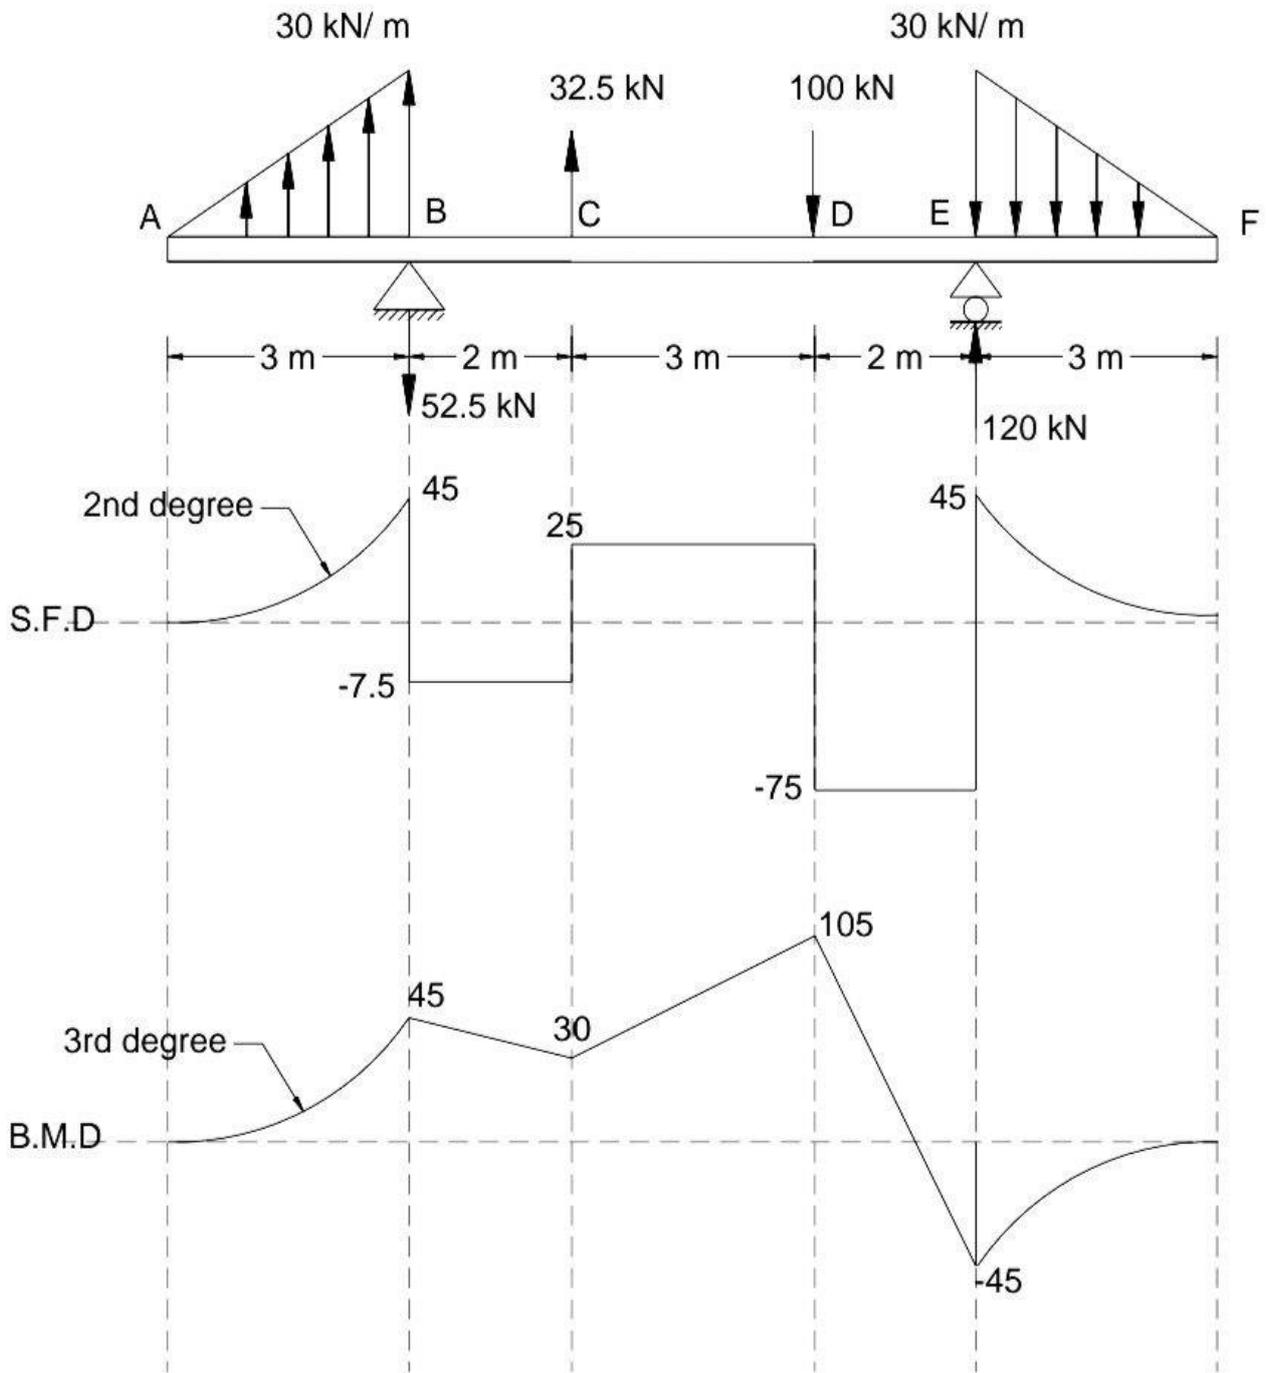

3- Curves:-

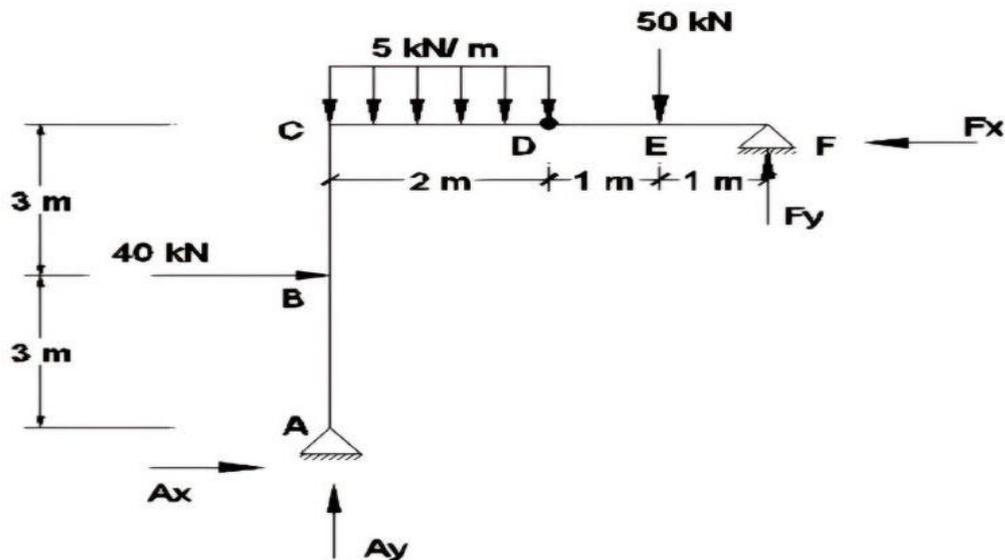

Shear force, Bending Moment and Axial Force Diagrams.

Q/ Draw SFD and BMD

EX1:- Draw the axial force; shear force and bending moment diagrams.

EX4: Draw the axial force; shear force and bending moment diagrams for the frame shown below.

Sol:

For segment (DEF)

$$\sum M_D = 0,$$

$$F_y * 2 - (50 * 1) = 0$$

$$F_y = 25 \text{ kN} \uparrow$$

For whole structure

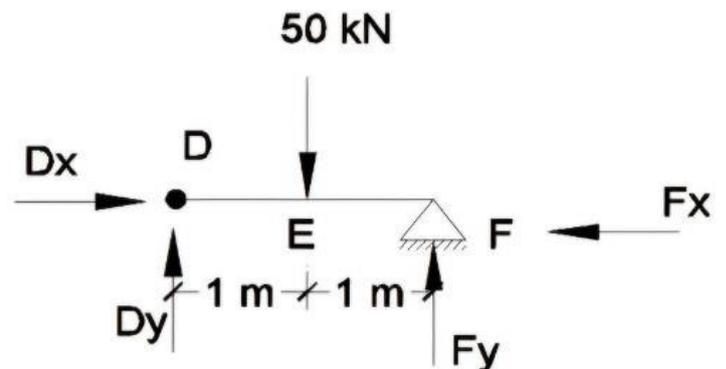

$$\sum M_A = 0 \Rightarrow F_x * 6 + (25 * 4) - (50 * 3) - (10 * 1) - (40 * 3) = 0$$

$$F_x = 30 \text{ kN} \leftarrow$$

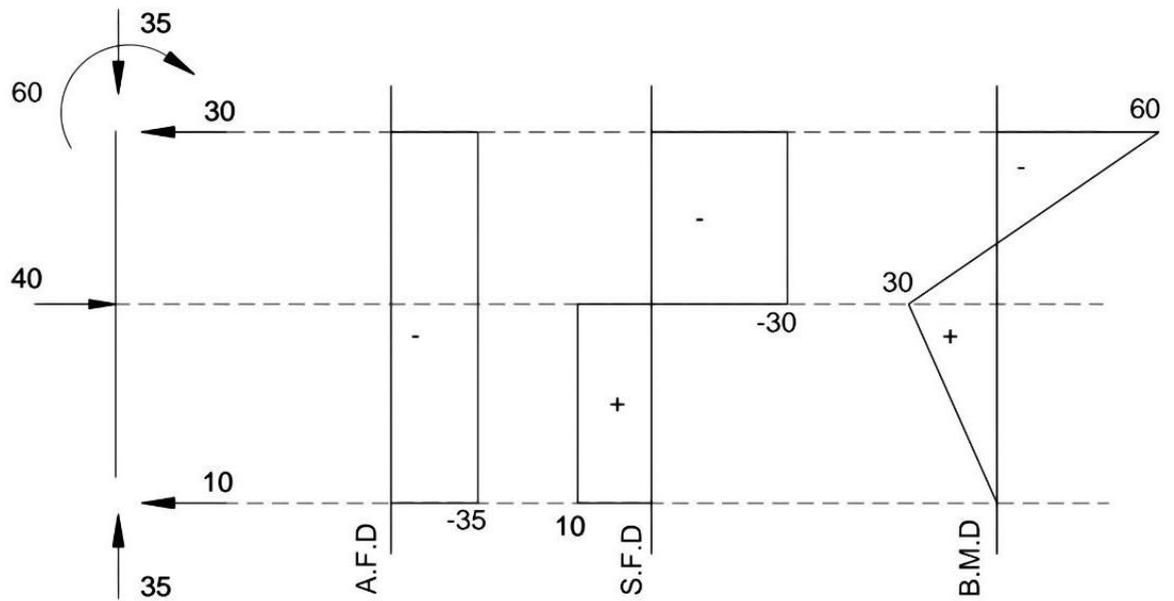

$$\uparrow \sum F_y = 0,$$

$$A_y + 25 - 50 - (5 * 2) = 0, \Rightarrow A_y = 35 \text{ kN} \uparrow$$

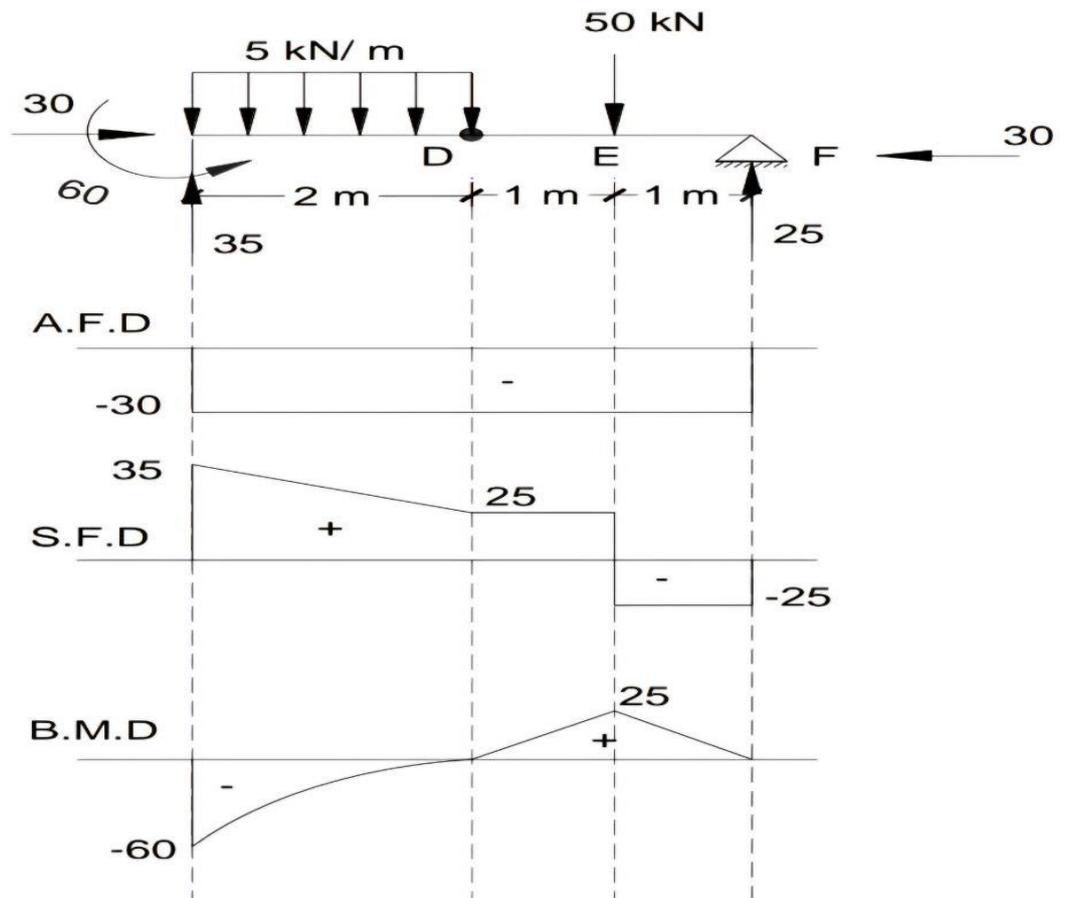

$$\rightarrow \sum F_x = 0, \Rightarrow -A_x - 30 + 40 = 0, \Rightarrow A_x = 10 \text{ kN} \leftarrow$$

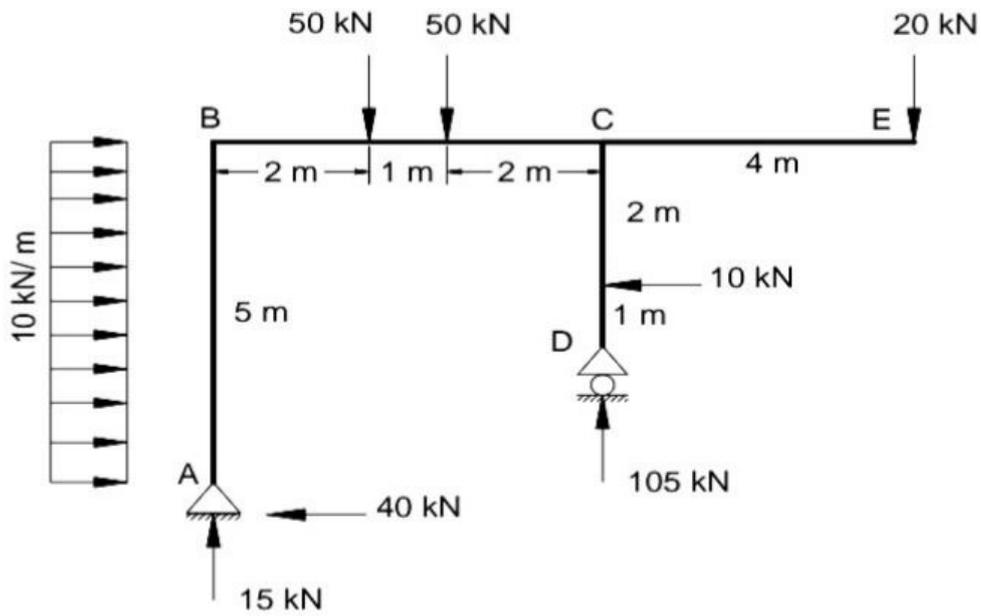

Segment ABC

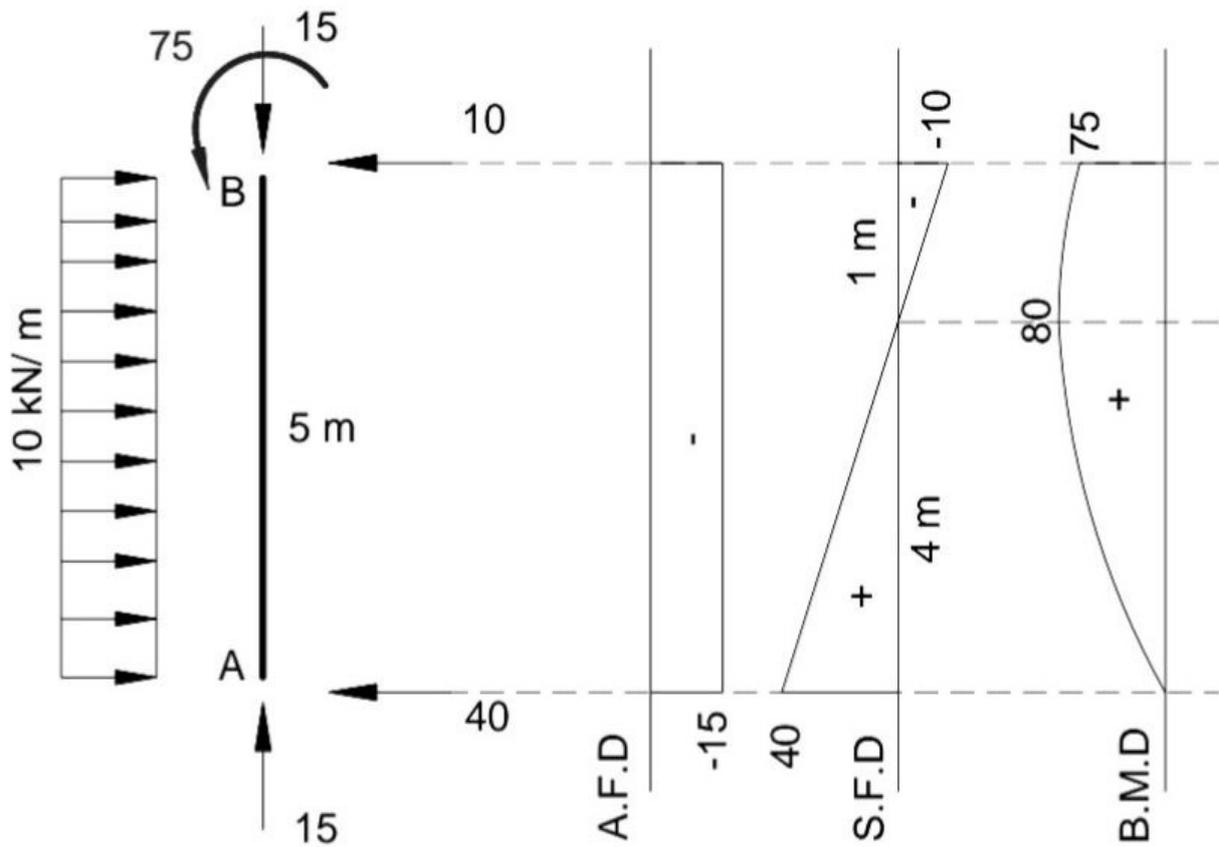

Segment CDEF

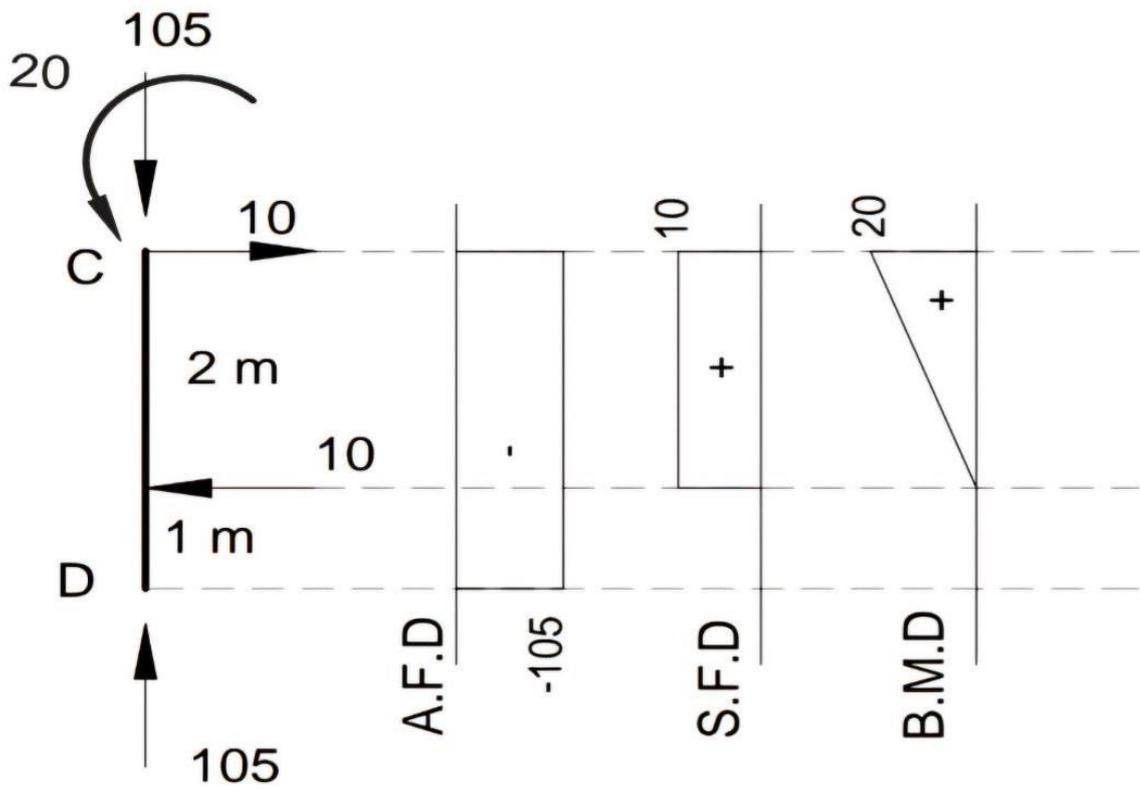

EX2: Draw the axial force; shear force and bending moment diagrams for the frame shown below.

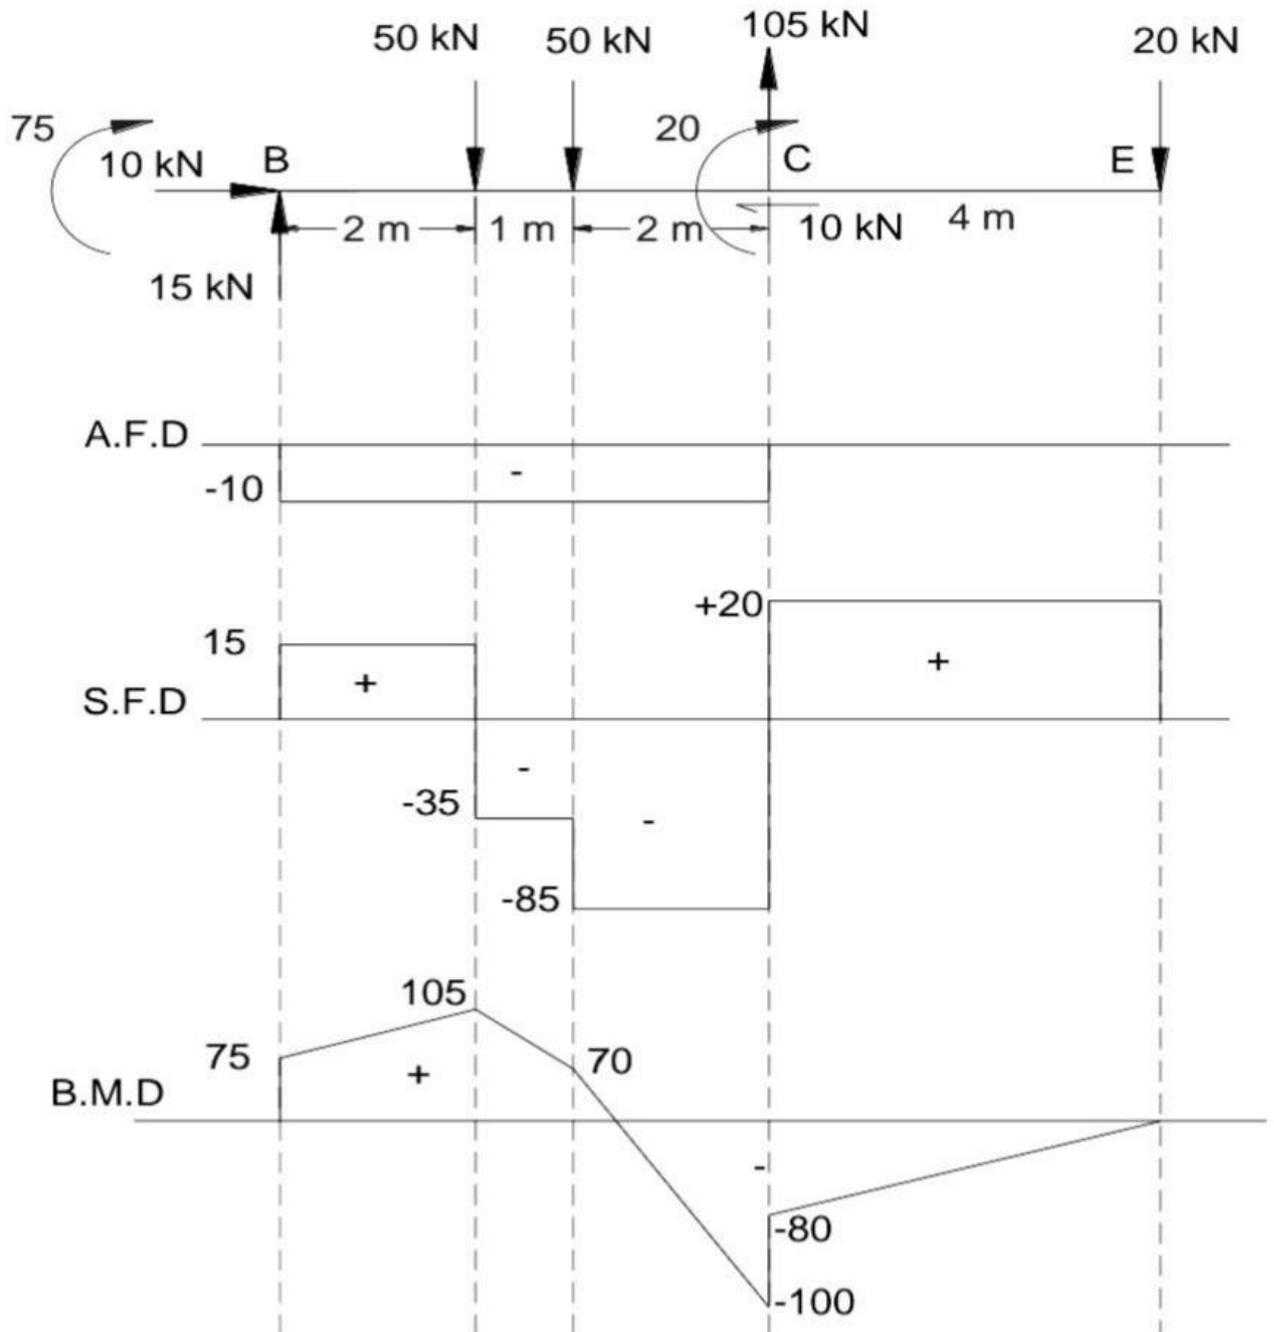

Sol: - SEGMENT (AB)

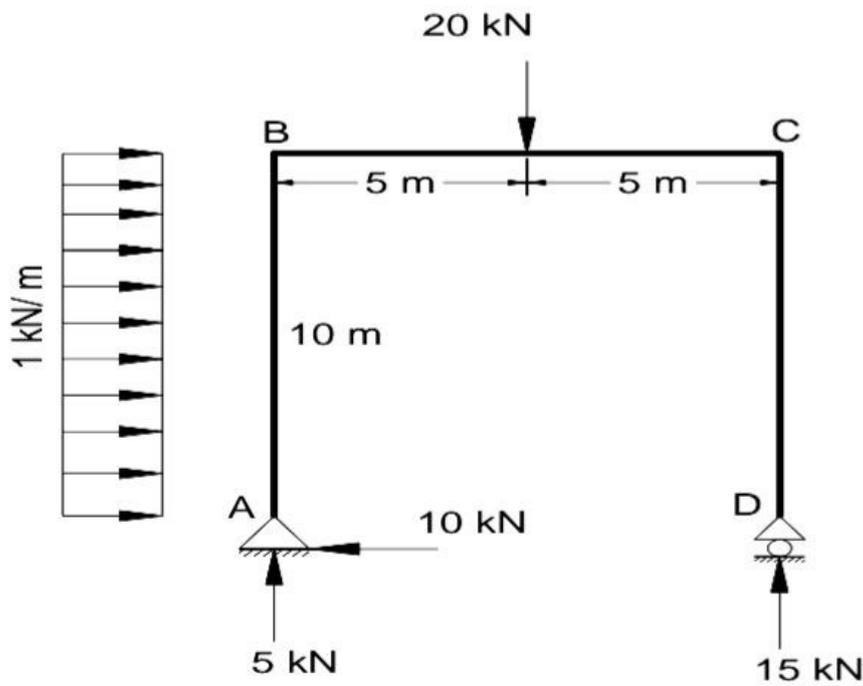

Segment (DC)

Segment BCE

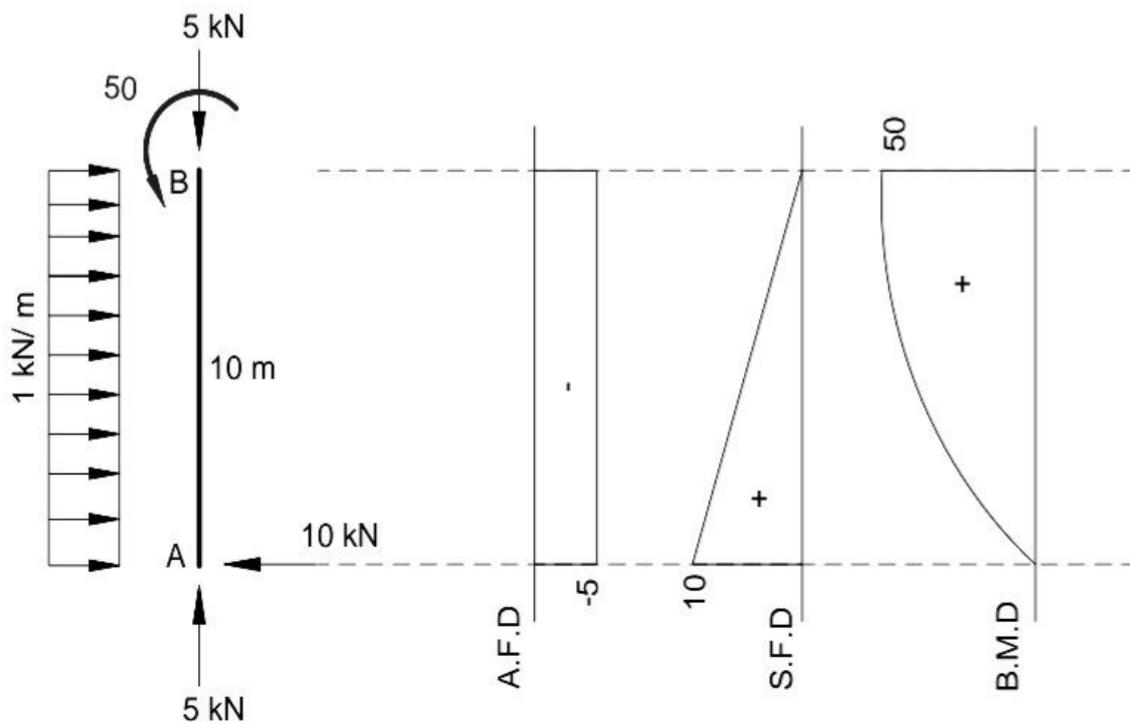

EX5: Draw the axial force; shear force and bending moment diagrams for the frame shown below.

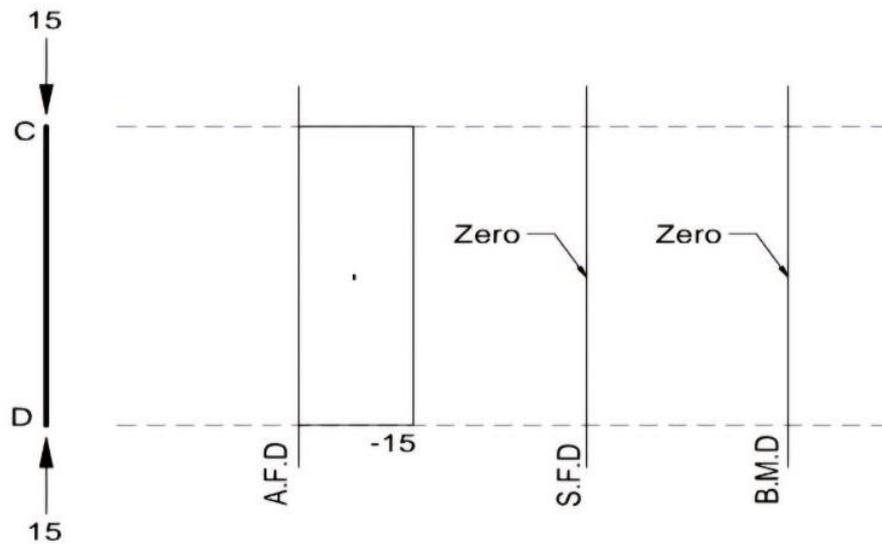

Sol:-

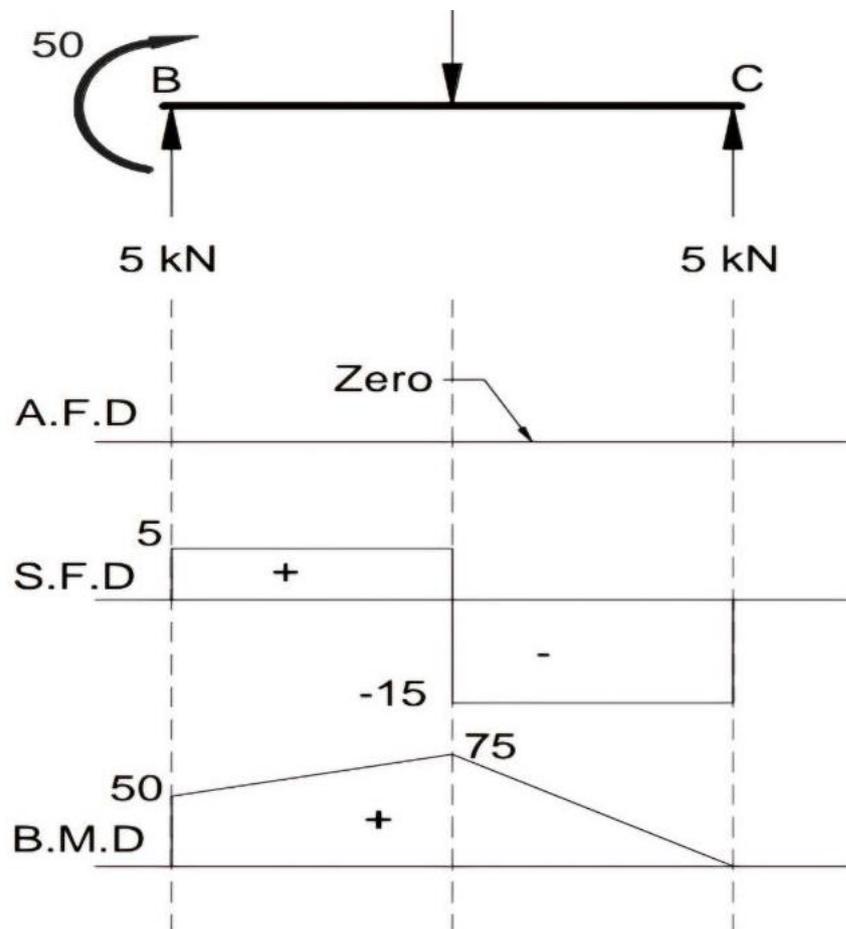

For Member AB:

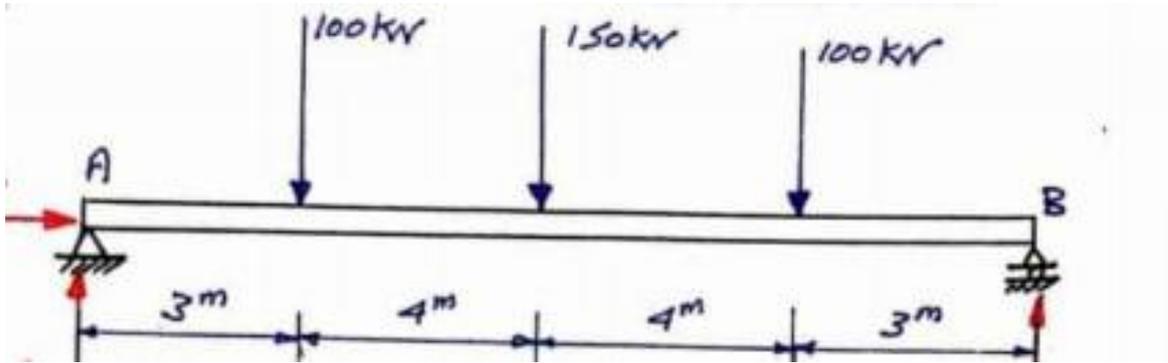

For Member CD:

For Member BC:

H.W1: Draw the axial force; shear force and bending moment diagrams for the frame shown below.

H.W2: Draw the axial force; shear force and bending moment diagrams for the frame shown below.
