❖Computer Fundamentals

Subject: Computer Skill I
Level: First
Lecturer: Asst. Lect. Ali Saleem Haleem

What is Computer?

A computer is an electronic device that manipulates information, or data. It has the ability to store, retrieve, and process data. You may already know that you can use a computer to type documents, send email, play games, and browse the Web. You can also use it to edit or create spreadsheets, presentations, and even videos.

Types of Computers

You should be familiar with the following seven computer types. Examples are supercomputers, mainframes, workstations, servers, notebooks, tablets, and personal computers. Each type of computer has a unique set of applications and functions.

Types of Computer: Microcomputer, Minicomputer, Personal computer, Supercomputer, Laptop, Tablet
