A A A STATE OF THE PARTY OF THE

Al-Mustaqbal University Department (Department of Building and Construction Engineering Technology) Class (Third) Subject (Engineering drawing) Lecturer (Asst.Lec.Israa Mohsain Kathim)

1st term – Lect. (Drawing Tools)

Circle

Drawing circles is one of the important commands that can be accessed through several Options are:

Through the Ribbon bar, we choose the command (circle).

From the drop-down menu bar, we choose the Draw menu and choose the Circle command.

By typing the shortcut (C) in the command bar

When you click on Circle, several options will appear, as follows:

Center, Radius

This command is used to draw a circle by selecting the center point and the radius length.

Center, Diameter

This command is used to draw a circle by selecting the center point and the diameter length.
